CONTENTS

	for the Treatment of Cystic Fibrosis
	Gene Therapy in Dogs with Mucopolysaccharidosis VII (MPS VII)
MESSAGE FROM THE DIRECTOR	Fighting Disease by Turning on Genes—
CROSS-CUTTING SCIENCE:	Insights from Vitamin D and Guggul Tree Resin
PAVING THE WAY TO DISCOVERY	Developing Strategies to Overcome Immune Rejection of Transplanted Cells and Organs26
Mouse Models of Metabolic Diseases and Developmental Processes	Highly Active Antiretroviral Therapy
Cell Signaling Pathways and	for HIV Infection—Benefits and Drawbacks
Blood Vessel Formation	Human Growth Hormone
Cell Signaling and Insulin Resistance	and Insulin Resistance
Tay-Sachs and Sandhoff Diseases	The HAART of Insulin Resistance
Orphan Nuclear Receptors	"Considering That Extra Helping?"—
in Health and Disease	Gut Hormones that Influence Weight Regulation 29
Further Developments in Stem Cell Biology	Identification of a Mediator of Leptin Action in Muscle
From Stem Cells to Specialized Cells 6	Of Mice and Muscles:
Understanding the Physiology	Increasing Stamina Through Gene Regulation31
of Hematopoietic Stem Cells 8	Ongoing and Newly Launched NIDDK Efforts in
Ongoing and Newly Launched NIDDK Efforts9	Diabetes, Endocrinology, and Metabolic Diseases 31
Lasker Awardee: Dr. James Rothman	Patient Profile: Mollie Singer— Living With Type 1 Diabetes
DIABETES, ENDOCRINOLOGY, AND METABOLIC DISEASES	Story of Discovery: Leptin— A Potential Treatment for Lipodystrophy
Blood Sugar Control in Type 1 Diabetes: A Balancing Act	Diabetes Education at NIDDK: The National Diabetes Education Program38
Continued Benefits of Intensive Blood Sugar Control	Patient Profile: Monica Boone— A Patient in the Diabetes Prevention Program 39
Potential Risks of Overly Tight Blood Sugar Control	Patient Profile: Aylin Riedel— Management of Diabetes and Kidney Disease as a Daily Balancing Act
Emerging Technologies for Measuring Blood Sugar	"Vision Statement": C. Ronald Kahn, M.D
Injected Insulin Does Not Delay Onset of Type 1 Diabetes	DIGESTIVE DISEASES AND NUTRITION51
Facing Down Autoimmunity in	Finding Ways to Understand and Treat Obesity
Type 1 Diabetes Prevention and Treatment	Investigating Leptin's Effects on Metabolism52
Cardiovascular Disease and Diabetes	Signaling Cells to Burn Energy—
New Insights into How Calpain-10	An Important Part of Energy Balance53
Gene Affects Risk for Type 2 Diabetes	A Genetic Locus for Severe Obesity
Genes Directing Pancreatic Development	Exploring Novel Compounds That May Lead to New Obesity Treatments
